Application No.	10/036,884
Filing Date	06/20/2002

1. CLAIM:

“ORIGINAL”

I claim my invention will help protect the mass number of credit card fraudulent activities.

This is done by various verification procedures such as checking the hidden picture when it is scanned, next to the picture identification of the consumer along with looking at the consumer himself. If there is no match or resemblance with the pictures and signatures, there will be suspicion of fraudulent activities, which can result to asking for more identification such as social security numbers or a pin number, which is also hidden inside of the credit card with picture.
